Prof Neil Simon

Date: / / (Appointments on Thursdays between 8.00am and 1.00pm)

Referral

The Rapid Access Neurology Clinic provides specialist diagnosis and management of acute neurological conditions including:

- New onset severe headache
- First seizure
- New onset movement disorder
- New onset cranial nerve injury

Patients are scheduled according to clinical urgency and contacted with appointment details.

Other acute referrals will be considered on receipt of referral. We will contact the GP if we are unable to review a referred patient.

The clinic does not provide ongoing neurological care for chronic conditions.

Please only refer patients who are safe to be referred to a rapid access outpatient service.

If there are any serious concerns, please refer them to the Emergency Department.

TIA patients are referred to the Emergency Department for triaging and initial management, and not to this clinic.
