Referral

The Perioperative Haematology Clinic provides specialist diagnosis and management of acute haematological conditions including:

- Perioperative anticoagulation management
- Preoperative optimization of anaemia or thrombocytopenia
- Preoperative Investigation and management of suspected/confirmed bleeding diathesis
- Investigation and management of a suspected/confirmed thrombophilia
- Perioperative management of a recent venous or arterial thromboembolism

Patients are scheduled according to clinical urgency and contacted with appointment details.

Other acute referrals will be considered on receipt of referral. We will contact the GP if we are unable to review a referred patient.
